Tech Proposal: Department of Homeland Security (DHS) Cloud Offerings

Task:

The Department of Homeland Security has committed to 12 cloud service offerings, including nine private cloud offerings and three public cloud offerings, as part of its commitment to the White House's "Cloud First" policy. By moving its disparate dev and test systems into a private cloud, DHS anticipates being able to greatly accelerate the delivery of new software and services. Server provisioning time should decrease from six months to a day, and the service will include on-demand testing and app management. **Your team is asked to submit a tech proposal to the department of homeland security for a cloud implementation project.**

NOTES: Please see minutes for assigned parts.

12 "Cloud Offerings" 9 private and 3 public: DHS

- Executive Summary:
 - Intro to Product.
 - Explain how it will help address the (DHS) problem.
- Execution Plan:
 - How will the work be done?
 - How to implement the cloud solution including assumptions and responsibilities?
- Technical Details:
 - Staffing Plans:
 - Who will do the work and how will it be managed?
 - Schedule:
 - Gantt Chart and milestones with dates
 - Cost
- Transition Plan or exhibits:

- How will this affect DHS in the future.
